

HANDHELD RETRACTABLE PULL- THROUGH KNIFE SHARPENER

Abstract

A retractable knife sharpener having an ergonomically shaped handle with an internal hollowed portion and an opening at one end thereof in communication with the hollowed portion and a sled slideably received within the hollowed portion and having an outer end with a knife sharpening structure and an inner end and selectively positionable, relative to the handle, between a retracted position and an extended position that exposes the knife sharpening structure.
